Subject: Managing confirmed cases of COVID-19 & infection prevention training

Dear Services and Providers,

Early childhood education and care (ECEC) services and approved providers must have a process for managing confirmed cases of COVID-19 as part of a service's COVID-19 risk mitigation strategy.

The NSW Department of Education has recently developed a [flowchart for the sector](#) to support services with the management of confirmed cases within ECEC services.

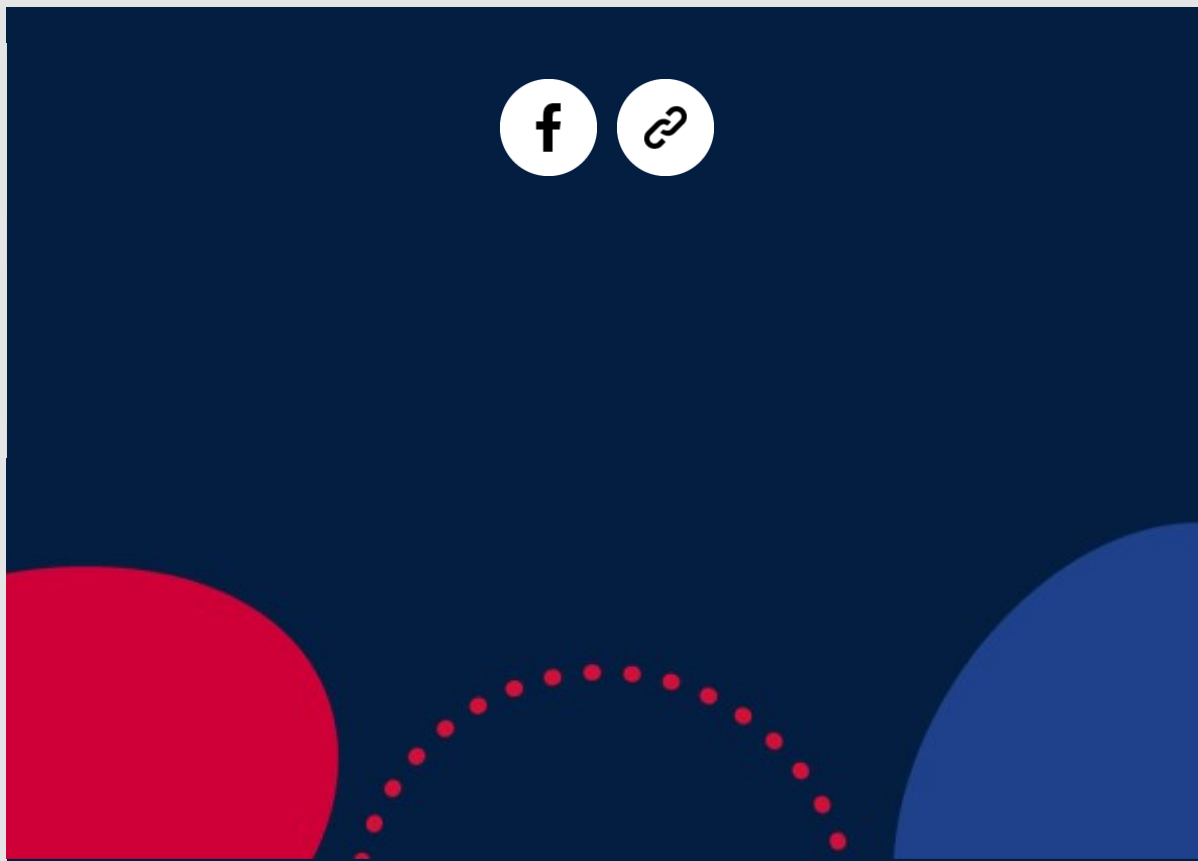

The flowchart outlines the steps approved providers and services should follow if a confirmed case is identified as well as some general health advice.

Please note that these are guidelines only and services are expected to develop their COVID-19 risk mitigation strategy based on their specific circumstances.

Infection prevention and control fee-free training

The NSW and Commonwealth Governments have committed a combined \$25.5 million to fund fee-free nationally accredited infection prevention and control training. The training will provide workers with the skills they need to better identify and respond to COVID-19 risks in the workplace.

Training is available across NSW and is delivered by approved Smart and Skilled training providers. Click [here](#) to find a provider in your region. Visit the [Training Services NSW website](#) for more information on infection prevention and control training.
